

VICTORY

GUITAR AMPLIFIERS CUSTOM MADE IN ENGLAND

Victory BDI Head available January 2016

Victory Amplification from the UK proudly announces the **BDI Head** as part of the award-winning Compact Series. The BDI is a standard version of the Rob Chapman RDI Signature model, sharing exactly the same all-valve design, circuit and feature set, but finished in black (the RDI is bright red). It's just 263mm wide and weighs only 6kg.

This ultra compact, single-channel head is a superb sounding rock machine designed for real, all-valve tone wherever you go. Up to 28 watts in full-power mode makes it great for gigging, while the two-watt setting will keep the neighbours happy!

BDI key features

1. SINGLE CHANNEL

A simple single-channel design that goes from clean/breakup to full-on overdrive.

2. TWO POWER MODES

High power is 28 watts RMS, from a pair of fixed-bias EL84 output valves running push-pull. It's plenty loud enough to gig. Low-power mode switches down to 2 watts push-pull for home and recording use.

3. BRIGHT SWITCH

Two preset levels of treble response to suit to your guitar choice and playing style.

4. DEEP SWITCH

Increases low-frequency response in the power section.

5. CONTOUR CONTROL

Turning clockwise increases bass and decreases mids. Anti-clockwise does the opposite, to help shape tones exactly as you like them.

6. FX LOOP WITH MIX

Place your pedals in the loop (after the preamp before the power amp) and control how much you hear of them using the wet/dry mix knob.

7. 100/110V OR 220/230V

Easily switchable so you can use the RDI all over the world (may require mains fuse change).

8. SUPER COMPACT!

It's tiny! Even smaller than our V30 /V40 /VX heads, it's just 263mm wide and weighs only 6kg. Overhead aircraft lockers? No problem with the Victory RDI.

VICTORY
